## DETAILED ACTION

### CLAIMS PRESENTED

Claims 1-15 are presented.

### *Drawings*

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. At this moment, only the drawing (figure 1) for prior art is in the application. The novelty (not prior art) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner,

the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

## **CLAIM REJECTIONS**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-15 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Each claim recites “partially consecutive” validity periods. How can anything be “partially” consecutive? One would expect either fully consecutive or not consecutive at all. The claims must be amended.

### ***Allowable Subject Matter***

Claims 1-15 appear to contain allowable subject matter which may be brought out upon a resolution of the issues noted in the section on rejections under 35 USC 112. The following is a statement of reasons for the indication of allowable subject matter: To the extent that the claims are understood, the claimed subject matter appears to refer to producing a plurality of certificate revocation lists in advance so as to reduce the chore of producing the certificate revocation lists and so as to reduce the need for the

operator to go in person to the root certificate authority computer and manufacture the certificate revocation lists. In the particular contexts of the particular limitations as recited in the claims, these features are not taught or suggested by the prior art.

***Conclusion***

The art made of record and not relied upon is considered pertinent to applicant's disclosure. The art disclosed general background.
